

Alpha

Mousetrapper Alpha is the world's first centered ergonomic pointing device with a full-sized, integrated keyboard. Alpha has a total of 19 programmable keys, making it our most dynamic Mousetrapper to date.

Benefits of Alpha

Mousetrapper Alpha is our most comprehensive product, which combines the benefits of a centered pointing device with the user-friendliness of a full-sized keyboard. Alpha connects to your computer via Bluetooth or USB cable and has a long battery life, so you can enjoy the flexibility of working wirelessly. By combining a keyboard and an ergonomic pointing device, you will never need to think about which keyboard is suitable for your Mousetrapper or adjust the gap between the pointing device and keyboard. Mousetrapper Alpha is the perfect product for those who want to reduce pain and improve wellbeing without having to compromise efficiency or flexibility.

Facts

- » Width: 12.3 inch
- » Height: 0.8 inch
- » Depth: 8.7 inch

Alpha is available in 5 different language layouts

- Nordics – product code: MT116
- US & Netherlands – product code: MT117
- France – product code: MT118
- UK – product code: MT119
- Germany – product code: MT121

Because Mousetrapper is positioned centrally in front of the keyboard it encourages an ergonomically healthy position that keeps your arms close to your body and your hands near the keyboard.

This helps you avoid and in many cases relieve strain injuries that can arise from over-stretching your arm, as you do with a conventional mouse. It eliminates the need to stretch beyond the keyboard while using the mouse. The wide, cushioned wrist supports also relieve strain on your neck, shoulders, arms and wrists.

Mousetrapper's unique Control Pad

By placing your index, middle and ring fingers on the roller pad you can control the cursor with simple movements as the roller pad moves smoothly in two dimensions. You can also click anywhere on the roller pad.

Tips for better posture and ergonomics:

- » Adjust your chair so that your feet are supported on the floor and keep your back straight while you are sitting.
- » Keep your arms close to your body while working.
- » Rest your arms on wrist supports or your desk.
- » Vary your working position; use a stand-and-sit desk to alternate between standing and sitting.
- » Position the screen at a comfortable distance that does not put strain on your eyes or neck.
- » Avoid repetitive strain injuries (RSI) by reviewing your choice of mouse.
