

Prime

Prime has everything you want from a Mousetrapper...and more. With wireless Bluetooth connection and 8 programmable keys, it offers you a range of options to customise your Mousetrapper exactly the way you want it. Mousetrapper Prime is an ergonomic mouse alternative that prevents repetitive strain injury and other problems that may arise when working with a traditional mouse.

Benefits of Prime

Everything you want from a Mousetrapper and a little bit more. Prime's 8 programmable keys offer you significantly more options for customising your Mousetrapper to your exact requirements. The functions of the buttons can easily be changed via MT Keys.

With Prime, you can work wirelessly via Bluetooth – of course, you can use a USB cable for connection if you prefer.

The wrist supports on Prime can be wiped clean and replaced, making it easy to keep the product in pristine condition. Prime comes with a foldable keyboard support that makes it equally compatible with standard higher-profile keyboards and the new ultra-thin keyboards.

Key features

- » Super-slim, ergonomic design
- » Control pad with click and scroll functions
- » Option to work wirelessly with Bluetooth
- » 8 programmable buttons that can easily be customized using MT Keys at www.mousetrapper.com/software
- » Wrist supports can be cleaned with surface disinfectants
- » Replaceable wrist supports
- » Height adjustment with folding non-slip surface
- » 4 months of battery life between charges
- » Rechargeable battery
- » 2000 dpi
- » Bluetooth 4.1

Facts

- » Width: 480 mm
- » Height: 20 mm
- » Depth: 110 mm
- » Weight: 720 g
- » Product code: MT123

Wireless usage

Connect the battery in the battery compartment and then connect the USB cable to charge until the LED is green. Then disconnect the cable and open the computers bluetooth menu and connect to "Prime ble".

Because Mousetrapper is positioned centrally in front of the keyboard it encourages an ergonomically healthy position that keeps your arms close to your body and your hands near the keyboard.

This helps you avoid and in many cases relieve strain injuries that can arise from over-stretching your arm, as you do with a conventional mouse. It eliminates the need to stretch beyond the keyboard while using the mouse. The wide, cushioned wrist supports also relieve strain on your neck, shoulders, arms and wrists.

Mousetrapper's unique Control Pad

By placing your index, middle and ring fingers on the roller pad you can control the cursor with simple movements as the roller pad moves smoothly in two dimensions. You can also click anywhere on the roller pad.

Tips for better posture and ergonomics:

- » Adjust your chair so that your feet are supported on the floor and keep your back straight while you are sitting.
- » Keep your arms close to your body while working.
- » Rest your arms on wrist supports or your desk.
- » Vary your working position; use a stand-and-sit desk to alternate between standing and sitting.
- » Position the screen at a comfortable distance that does not put strain on your eyes or neck.
- » Avoid repetitive strain injuries (RSI) by reviewing your choice of mouse.
