

Prime

Prime has everything you want from a Mousetrapper and more. With wireless function and eight programmable buttons, you have plenty of options for configuring your Mousetrapper exactly as you want it. Mousetrapper Prime is an ergonomic alternative to a mouse that prevents repetitive strain injuries and other problems that can occur when you use a conventional mouse.

Benefits of Prime

Everything you want from a Mousetrapper and more. A total of eight programmable buttons give you more options for setting up Mousetrapper to work exactly the way you want. The functions of the buttons can easily be changed via MT Keys.

Prime lets you work wirelessly via USB, and two separate buttons make it easy to scroll and zoom in and out.

The replaceable and wipeable wrist supports on Prime make it easy to keep the product clean. Prime has a folding keyboard support, which makes it equally compatible with new low-profile keyboards and higher-profile standard keyboards.

Facts

- » Width: 18.8 inch
- » Height: 0.8 inch
- » Depth: 4.3 inch
- » Weight: 1.5 lbs
- » Product code: MT111

Key features

- » Super-slim, ergonomic design
- » Control pad with click and scroll functions

- » Wrist supports can be cleaned with surface disinfectants
- » Replaceable wrist supports
- » Height adjustment with folding non-slip surface
- » 4 months of battery life between charges
- » Rechargeable battery
- » 2000 dpi

Battery - & wireless usage

Remove the USB dongle from the right side of the product and insert it into a USB port on the computer. If you're not planning to use Prime wireless, we recommend that you disconnect the battery.

Because Mousetrapper is positioned centrally in front of the keyboard it encourages an ergonomically healthy position that keeps your arms close to your body and your hands near the keyboard.

This helps you avoid and in many cases relieve strain injuries that can arise from over-stretching your arm, as you do with a conventional mouse. It eliminates the need to stretch beyond the keyboard while using the mouse. The wide, cushioned wrist supports also relieve strain on your neck, shoulders, arms and wrists.

Mousetrapper's unique Control Pad

By placing your index, middle and ring fingers on the roller pad you can control the cursor with simple movements as the roller pad moves smoothly in two dimensions. You can also click anywhere on the roller pad.

Tips for better posture and ergonomics:

- » Adjust your chair so that your feet are supported on the floor and keep your back straight while you are sitting.
- » Keep your arms close to your body while working.
- » Rest your arms on wrist supports or your desk.
- » Vary your working position; use a stand-and-sit desk to alternate between standing and sitting.
- » Position the screen at a comfortable distance that does not put strain on your eyes or neck.
- » Avoid repetitive strain injuries (RSI) by reviewing your choice of mouse.
